

Parent Attestation Of Daily Health Status

Please complete/present this NERSBA Attestation Document to your assigned bus driver prior to boarding assigned bus.

Scholar Name: _____ (please print)

Parent/Guardian Name: _____ (please print)

1. Has your child had close contact (within 6 feet for at least 15 minutes) in the last 14 days with someone diagnosed with COVID-19, or has any health department or health care provider been in contact with you and advised you to quarantine?

- Yes *The child should not attend school. The child can return 14 days after the last time he or she had close contact with someone with COVID-19, or as listed below.
- No *The child may attend school if the child is not experiencing COVID-like symptoms.

2. Does your child have any of these symptoms?

- Fever
- Chills
- Shortness of breath or difficulty breathing
- New cough
- New loss of taste or smell

If a child has any of these symptoms, they should stay home, stay away from other people with parent/guardian contacting your child's health care provider and Mrs. Pamela Riggs, our Career

3. Since they were last at school, has your child been diagnosed with COVID-19?

- Yes
- No

If a child is diagnosed with COVID-19 based on a test, their symptoms, or does not get a COVID-19 test but has had symptoms, they should not be at school and should stay at home until they meet all criteria below,

A child can return to school when a family member can ensure that they can answer YES to ALL three questions:

- o Has it been at least 10 days since the child first had symptoms?
- o Has it been at least 3 days since the child had a fever (without using fever reducing medicine)?
- o Has it been at least 3 days since the child's symptoms have improved, including cough and shortness of breath?

If a child has had a negative COVID-19 test, they can return to school once there is no fever without the use of fever-reducing medicines and they have felt well for 24 hours.. If a child has been diagnosed with COVID-19 but does not have symptoms, they should remain out of school until 10 days have passed since the date of their first positive COVID-19 diagnostic test, assuming they have not subsequently developed symptoms from their initial positive test.

If a child has been determined to have been in close contact with someone diagnosed with COVID-19, they should remain out of school for 14 days since the last known contact, unless they test positive. In which case, criteria above would apply. They must complete the full 14 days of quarantine even if they test negative.

I attest the information above is true to the best of my knowledge as of: ___ / ___ / ___, ___ : ___ AM PM (circle one)
